EDUCATION

Misr International University (MIU)

Sept. 2023 -- Present

Bachelor of Science in Software Engineering

Cairo, Egypt

- Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development, OOP, Software Engineering.
- Current Focus: Cloud Architecture and High-Performance Backend Systems.

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript (ES6+), PHP, SQL, HTML/CSS
Frameworks/Tools: React.js, Node.js, Spring Boot, Tailwind CSS, Framer Motion, Docker
Cloud & DevOps: Google Cloud Platform (GCP), Git/GitHub, Linux CLI, Apache
Certifications: IBM AI Fundamentals, Google Cloud Computing Foundations

PROJECTS

BiteBite Online

React.js, Tailwind CSS, Framer Motion

- Developed a responsive food delivery interface focusing on modern UI/UX and seamless animations.
- Implemented state-driven shopping cart logic and dynamic menu filtering.

TripLink

PHP, MySQLDB, JavaScript, Apache

- A comprehensive reservation management system for scheduling and resource allocation. Handles conflicts, user roles, and reporting.

Blink to Click

Python, OpenCV, HCI

- Engineered an accessibility tool that translates eye blinks into mouse commands for impaired users.
- Achieved high-accuracy eye tracking using computer vision libraries and Python scripts.

EXPERIENCE

Undergraduate Researcher / Developer

2023 -- Present

Self-Directed & MIU Projects

Cairo, Egypt

- Consistently delivering production-grade code across various stacks (MERN, LAMP).
- Integrating cloud solutions using GCP to automate project deployment and scaling.
